- In 19th century women were not admitted into universities and laboratories.
- Entry of women into universities were considered as downfall of academic progress.
- Making a remarkable contribution was not a simple task for female mathematicians.
- Still we have few fabulous women mathematicians who breached the barriers and shine as examples for generations to come.

- Diversification of her efficiency is the main cause for lag in her professional excellence.

So, how to overcome???

- Thus it becomes essential to have insight into the life of female icons in mathematics.
- It is an honor to quote them and an opportunity to seed the need for women's contribution in the field of mathematics.

Although she started working at the University of Göttingen in 1915, she was at first permitted to lecture only as an “assistant” under a male colleague’s name.

In 1919, she was granted a “Privatdozentin” title, which certified her to teach, but she still did not get paid.

It was only in 1922, when Emmy became an associate professor, that she received a menial stipend for her service.

Despite her brilliant contributions, Emmy was not promoted to professor because of gender discrimination.

‘MOTHER OF ALGEBRA’

- Noether’s mathematical work is divided into three epochs ;
 - Contribution to Theories of algebraic invariants and number fields (1908 - 1919)
 - Theory of ideals in commutative rings(1920- 1926)
 - She published papers on noncommutative algebras and hypercomplex numbers and united the representation theory of groups with the theory of modules and ideals (1927 - 1935).
- She kick-started an entire discipline of mathematics called **abstract algebra**.
