Department of Mathematics

Education Field Trip - Pondicherry  
Date : 01.11.2023

Department of Mathematics arranged a Field trip for Mathematics students to Pondicherry. First we took the students to Auroville, which is an experimental township mostly in the state of Tamilnadu, India and some parts in Pondicherry. The main reason to visit is to see the outstanding architectural creation Mahimandir. It is recognised as the first and only internationally endorsed ongoing experiment in human unity and transformation of consciousness.

The purpose of Auroville is to realise human unity in diversity. At the centre of Auroville there stands Mahimandir, the soul of city, a place for individual silent concentration in an oval shaped peace area surrounded by a lake.

Mahimandir is equipped with a solar power plant and is surrounded by manicured garden. When there is no sunlight the sunray on the globe is replaced by a beam from a solar powered light.

The students learnt the use of meditation and the concepts involved in the construction.
