[❖ Interest on delayed payment of tax: Section 50 of CGST Act, 2](#)

Example -1

ABC Ltd needs to pay the GST of Rs.10 lakh on or before 20th May, 2018. However, it only manages to pay the tax on 20th June, 2018. Please calculate Interest on tax which is to be paid.

To calculate the correct interest we need the following:
Interest rate (18% as per section 50)
No. of days default (31 days, we shall not count 20th may)
Outstanding tax (Which is Rs.10 lakh)

Hence, interest on late payment of tax will be Rs.15,287/- ($10,00,000 * 18% * 31 / 365$)

Report on the Workshop “Biochemistry based Experiments”

Date : 13.02.2021

Class : II B.Sc. Chemistry, III B.Sc. Chemistry, I B.Sc. Chemistry, I B.Sc. Zoology, II B.Sc. Physics and II B.Sc. Mathematics

No. of Beneficiaries : 90

Details of the Resource person: Dr. N. KannikaParameswari M.Sc., M.Phil., PhD

Professor

Department of BioChemistry,

Dr. NGP Arts and Science College

Coimbatore

Aim of the workshop

Our aim was to make students become familiar with some biological phenomena and are given the opportunity to acquire some simple skills.

We anticipated students to understand such things as planning and validating: experiments which can be more extensive and perhaps 'open-ended'

These ideas can be extended into the third year of their under graduate programme when students carry out a small research project.

Objectives of the workshop

1. To Illustrate Lectures

- Illustrate phenomena, equipment, by demonstration and personal handling
- Experience handling biological materials - Learn standard (or historical) techniques, verify principles
- Realise importance of biochemistry in medicine, industry, etc.

2. To inculcate Laboratory Skills

- to develop manipulative skills
- To learn how to use a particular apparatus
- To learn how to follow a protocol [controls, safety]
- To observe and record accurately
- To process data, (i.e) use statistical methods
- To present data, results, and conclusions

List of Experiments done during the workshop

- Separation of Serum from blood
- Estimation of alkaline phosphatase in serum
- Estimation of protein in serum by Lowry's method
- Determination of Blood group and Rh type in human
- Determination of the bleeding time of a subject

- Determination of the clotting time of a subject
- Estimation of Haemoglobin in blood
- Isolation, Estimation of chlorophyll and Separation by

AFFORESTATION

Afforestation is the establishment of a forest or stand of trees (**forestation**) in an area where there was no previous tree cover. Many government and non-governmental organizations directly engage in afforestation programs to create forests and increase **carbon capture**. Afforestation is an increasingly sought-after method to fight climate concerns, as it is known to increase the soil quality and organic carbon levels into the soil, avoiding desertification.

Introduction 000000 Probability Spaces 00000000000000000000

Probability Measure

Let Ω be a sample space and \mathcal{F} be a σ algebra of subsets of Ω and P a real-valued set function defined on (Ω, \mathcal{F}) . Then P is called a **probability measure** provided that

- for any event A , $0 \leq P(A) \leq 1$;
- $P(\Omega) = 1$;
- for any sequence A_1, A_2, \dots of disjoint events,

$$P(\cup_{i=1}^{\infty} A_i) = \sum_{i=1}^{\infty} P(A_i).$$

The triplet (Ω, \mathcal{F}, P) is called the probability space.

Introduction 000000 Probability Spaces 00000000000000000000

Origin of Probability

- In the end of 19th century, Laplace's classical definition of probability was extended to the events with infinite outcomes - the notion of likelihood of events was fundamental in its development.
- Andrey Nikolaevich Kolmogorov - "Foundations of the theory of probabilities" - combined the notion of sample space and measure theory to axiomatise probability.
- Kolmogorov's work provided a logically consistent foundation for probability theory

Introduction Probability Spaces Probability Spaces

Applications

- Experimental scientists use statistics every time they report their results, to give an indication of the accuracy of their measurements and the likelihood they may be wrong.
- Medical researchers use statistics to establish the likelihood that a drug or treatment will be effective.
- Social scientists use statistics to generalize about people's behavior, and marketers and political surveyers put the same kind of study to practical use for the benefit their clients.
- Insurance companies have a business plan that is entirely based on their understanding of statistical probabilities;
- Banks are doing the same thing with their lending, but at risk levels that they hope are much lower.
- Every manufacturing company applies statistical techniques to quality control and customer satisfaction.

Conclusion

- Much more work can be done to investigate the structure of Fractional Graphs which would have applications in Communication networks, Information Technology, Pattern Clustering, Image Retrieval and so on and now we are dealing with a concept of domination function on a Fractional Graphs.

CRISP SET

In real life Scenario, there are so many uncertainties. Many complicated problems arising in the fields of engineering, social science, economics, medical science etc involving uncertainties, classical methods are not sufficient to solve them.

A set is a well defined collection of objects. By well defined means to know whether a particular object is contained or not.

Let X be a non empty set and A is a subset of it. The characteristic function

$$\psi_A: X \rightarrow (0,1) \text{ is defined as } \psi_A(x) = \begin{cases} 1 & \text{if } x \in A \\ 0 & \text{if } x \notin A \end{cases}$$

Characteristic Function

- Consider a finite set $X = \{a, b, c, d, e, f, g\}$ and a subset $A = \{a, b, d, f\}$
- A can be represented by the set of pairs $A = \{(x, \psi_A(x)) : x \in X\}$
 $= \{(a, 1), (b, 1), (c, 0), (d, 1), (e, 0), (f, 1), (g, 0)\}$

The subset A of a set X can be characterized by a characteristic function which associates with either 0 or 1.

Fuzzy Set

FUZZY SET

- The concept of Fuzzy set introduced by **Zadeh in 1965** is a strong Mathematical tool to deal with such type of problems. Fuzzy sets provide not only a meaningful and powerful representation of uncertainties, but also significant representation of vague concepts expressed in natural languages.
- A **fuzzy set (FS)** A in E is defined as an object of the form $A = \{(x, \mu_A(x)) : x \in E\}$ where the **membership function** μ_A defined has the form $\mu_A : E \rightarrow [0, 1]$, where $[0, 1]$ denotes the interval of real numbers from 0 to 1, inclusive.
- Fuzzy set is characterized by its membership function.
- Fuzzy set is a generalization of classical set.
- Membership function is the generalization of characteristic function

- Fuzzification is the transformation of gray level of the image to a membership function using some mathematical function.
- After fuzzification, depending on the user's requirements, the membership values of the gray level are modified using an appropriate fuzzy technique. Techniques for modifying the membership values of the pixels in an image may involve fuzzy rule-based approach, fuzzy logic, and so on.

In 19th century women were not admitted into universities and laboratories.

- Entry of women into universities were considered as downfall of academic progress.
- Making a remarkable contribution was not a simple task for female mathematicians.
- Still we have few fabulous women mathematicians who breached the barriers and shine as examples for generations to come.

- Diversification of her efficiency is the main cause for lag in her professional excellence.

So, how to overcome???

- Thus it becomes essential to have insight into the life of female icons in mathematics.
- It is an honor to quote them and an opportunity to seed the need for women's contribution in the field of mathematics.

- Although she started working at the University of Göttingen in 1915, she was at first permitted to lecture only as an "assistant" under a male colleague's name.
- In 1919, she was granted a "Privatdozentin" title, which certified her to teach, but she still did not get paid.
- It was only in 1922, when Emmy became an associate professor, that she received a menial stipend for her service.
- Despite her brilliant contributions, Emmy was not promoted to professor because of gender bias.

Day I - 14.06.2021

In science, many notable events occurred and discoveries that justify centenary celebrations. But there are a select few that are more than notable: Einstein was awarded the 1921 [Nobel Prize in Physics](#) for his discovery of the law of the Photoelectric effect and [Robert Millikan](#) was awarded the Nobel Prize in 1923 for his work on the elementary charge of electricity and on the photoelectric effect. Usually, bright scientists make outstanding contributions some even comparable to Einstein and after they die, the memory and public awareness of their greatness recedes into history.

To celebrate and remembrance one of the greatest scientist of our time, we the Department of Physics, Sri G.V.G Visalakshi College for Women, Udumalpet and Indian Association of Physics Teachers (IAPT) jointly organized Programme for School and College students from 14.06.2021 to 16.06.2021 via digital platform under DBT Star College Scheme.

The first day was started by inauguration in the morning at 10.30 am through Zoom platform.

Mrs B.Nirmala, Head of the department has welcomed the participants, the Guests and explained the purpose and the background of the celebration. Dr.M.Nirmala, Assistant Professor of Physics has introduced the resource person. **Mrs.Smita Fangaria**, Physics teacher, Amity International School, Noida, UP was the resource person of the first session and she delivered a special address on the “**Story of Photo electric effect**”.

The resource person narrated the story of photoelectric effect from electromagnetic induction, study the effect of light, Hallwach’s experiment, Philip Lenard setup, results obtained by Lenard’s experiment. She discussed about the Einstein’s research papers on Brownian motion, special theory of relativity, Photoelectric effect, Einstein theory, photoelectric equation, entry of Millikon, Millikon’s experimental setup, materials used for producing photoelectric effect and experimental determination of h. Finally she ended up with how Einstein published his results for getting Nobel prize in the year 1921. Nearly 200 students from schools & colleges were participated in this sessionr.

The second session was started at 11.30 am and Dr.S.Aram, Associate Professor of Physics has introduced the resource person. In the second session **Dr.Vimal Jerald**, St. Joseph’s College Tiruchirapalli, Tamilnadu was acted as a resource person and demonstrated about on e-

tools for Creating and Editing videos using power point 2010 to the participants. He also showed how to add animations, audio, voice and video in ppt. The resource person clarified for the queries raised by the participants and finally Ms.V.Tamilmozhi of II B.Sc. Physics student has proposed the vote of thanks.

Day II - 15.06.2021

The second day session starts with welcome address by Dr.B.Kavitha , Assistant Professor of Physics. She welcomed and introduced the resource person. **Dr. Joga Chandrasekhar Rao**, Asst. Prof of Physics, Govt. Degree & PG College Salur, Andhra Pradesh to the participants. He elaborated the operation of electroscope to detect charge by the relative displacement of a reference object due to the electrostatic force of repulsion governed by Coulomb's Law. He also showed the demonstration of photoelectric effect by using various types of electroscopes with Neon and UV lamp. Also demonstrated how the electric charge transferred from one object to another via a simple electroscopes. . M.Harini kavya of III B.Sc. Physics has thanked the resource person. In the second session Dr.Vimal Jerald demonstrated about screenmatic and freecam for recording windows. Students enthusiastically interacted with the resource person and clarifies their doubts.

Day III - 16.06.2021

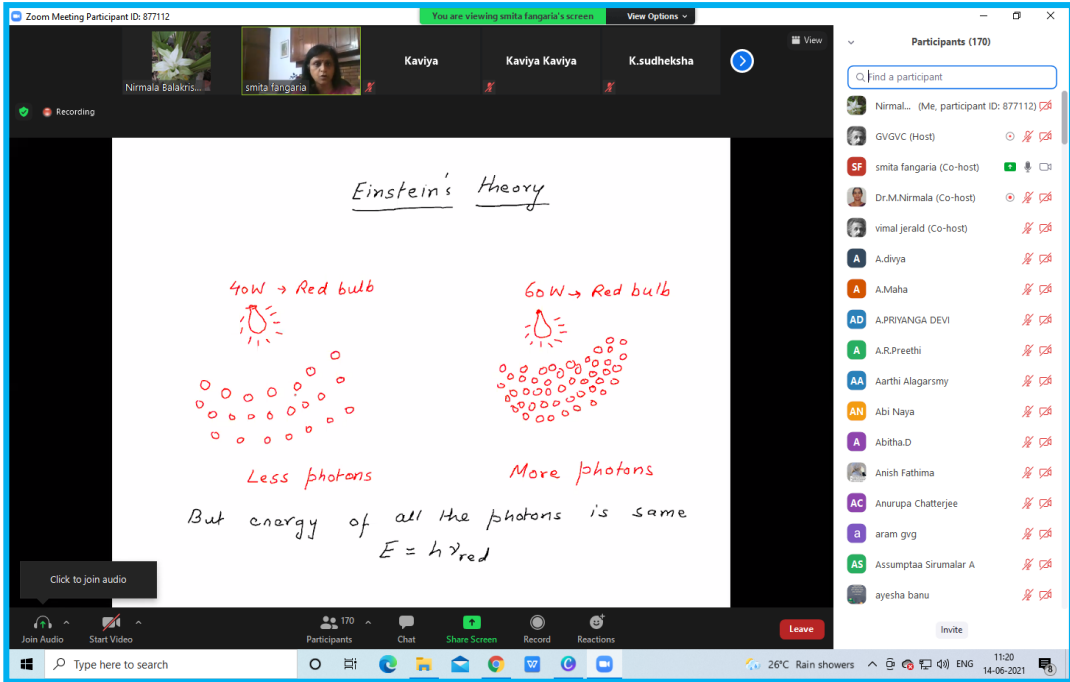

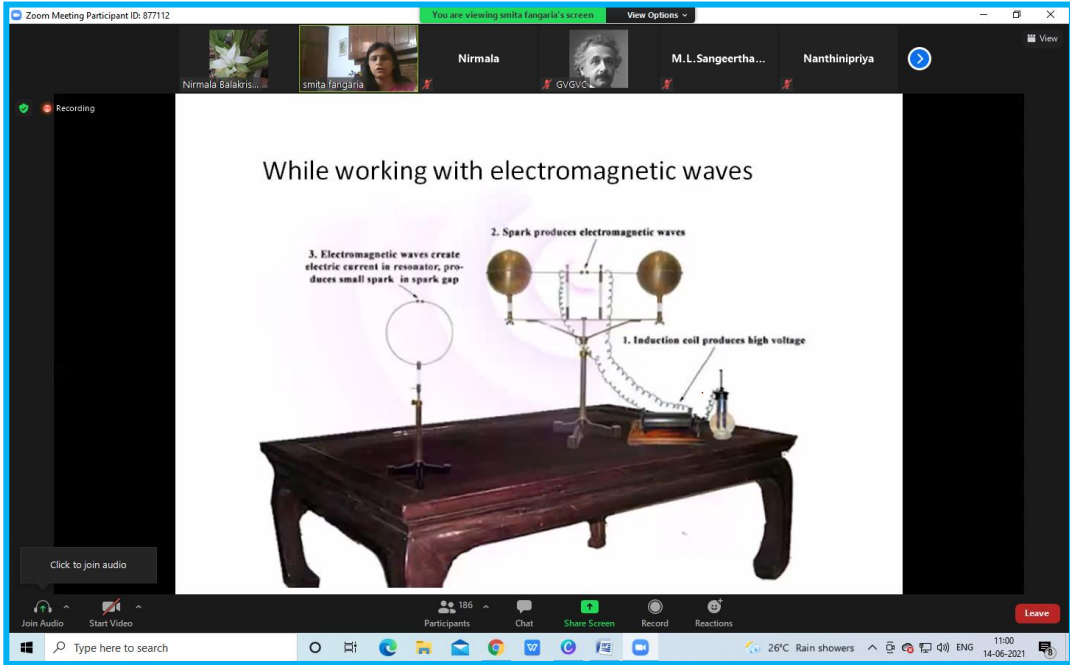

On the third day **Padma Shri Prof. Dr H.C Verma**, IIT, Kanpur joined the first session and added the value of the celebration. Dr.N.Rajeswari, Principal of our college welcomed the resource person. Followed by her Mrs.T.V.Banumathi, Controller of Examinations & Associate Professor of Physics has introduced the Prof. Dr H.C Verma to the students. Students from Schools and Colleges were interacted with the resource person and asked interesting questions to Prof..H.C.Verma. He answered to the students questions happily and motivated them. The resource person asked the students to study physics concepts in depth and in an interesting way. Some of the participants shared their own made electroscope and demonstrated the same. The resource person has surprised about their interest and appreciated the participants.

Mrs.B.Nirmala, Head of the Department proposed the vote of thanks for the resource persons for their virtual gracious presence.

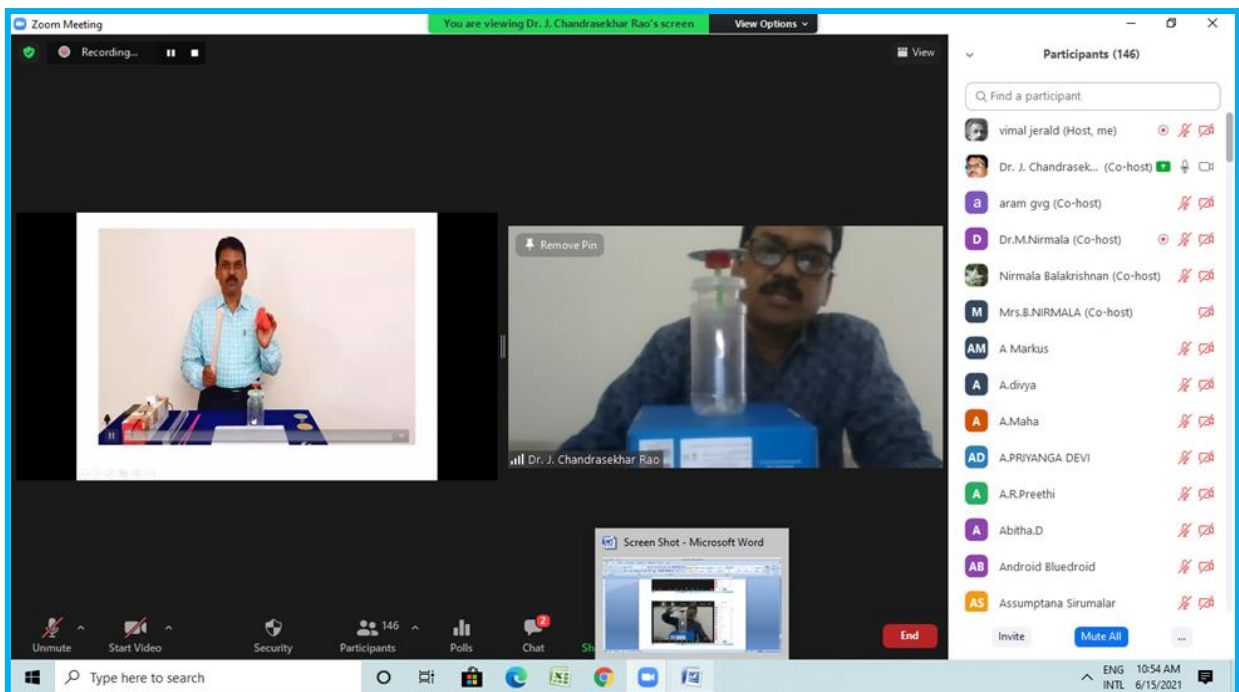

In the second session, students showed their PPT on Physics concept with video recording to the resource person. Then the resource person **Dr.Vimal Jerald** demonstrated open shot software for adding title, images, videos audio to a new project. Then he clearly detailed with demonstration editing the videos, changing background and saving the Project. Participants interacted with the resource person enthusiastically and clarified their doubts regarding creating videos and uploading it in Google classroom. Instructions were given to the participants for video Contest and students are asked to submit their videos in a stipulated time in Google class room. Ms. J.Sreesudha, Assistant Professor of Physics has proposed the vote of thanks to the Resource p[erson and to the participants. Through this workshop on “Video Creating and Editing”, the participants gained a sound understanding of the concepts of video making. Totally 200 participants were benefitted through this programme.
