DBT-Star College Scheme

DBT-Star College Scheme

College

Sei G.V.G. Visalakshi College for Women is a prestigious Autonomous Institution founded in the year 1953 by the recovered Philaethropes Sis C. V. Govandesamy Naide, an Industrialist from this part of the district. As one of the Women's College affiliated to Bharathan Deriversity with 66 years of Academic Excellence in the Empowerment of Women, the college is funded by the Department of Science and Technology under the DST-FBT (level 0) funding and has also been identified to participate in DBT-Star College scheme for enhancing the activities of the Science Departments. The Institution is an ISO 9001:20. Conflied, with the NAAC Re-Accreditation at the 'A' Grade level. The college a continuously striving to establish the Quality Policy, "to Educate, Empower and Elevate" by implementing the concept of Outcome Based Education (OBE) from the academic year 2017-18 romwands.

Department

The Department of Physics was established as a Major Department in the year 1986 at the B.Sc Degree level and the Department has been upgraded as a PG department from the academic year 2013-14. Every year Under Graduate students take-up National Configure Physics Examination (NGPS) conducted at the All-India lev-- Indian Association of Physics Teachers (IAPT) in the month of L. -demimpd-by also attend summer coones in the Experimental ? Institutions such as Indian Academy of Sciences, Bangalos U Beaty Centre for Science Education and Research, Mumbos etc. Part graduate students undergo Summer Internship program at the Centre of Nanoscience and Nanoschunlegy, Bharathur University, Colmbatore, ICCAR Kalpakkem, ARCI-Chennai, Tamilnailu Academy of Sciences, Canchigram Rural Institute esc. The Department organizes Seminars, Workshops, Contenences and Intercollegiate competitions to motivate the mademy to update the subject knowledge and take up the research activities in the recent areas.

TECHNICAL SESSIONS & HANDS-ON-TRAINING

Day 1

11.15 am to 12.15 pm

Basics of Energy-Renewative Energy

- Solar Energy Technology

Types of solar technology

12.15 pm to 1.15 pm

Basic Electricals - Vhitage, Current, Power, Energy, Connections.

Banic Electronics -

Resister, Capacities. Diodes.

1.45 pm to 3.05 pm

Solar PV Technology - Cross section

of solar cell. Solar cell operations. Satur cell specifications, Solar cell Testing Conditions. Cell Manufacturing process.

Types of Splat cells.

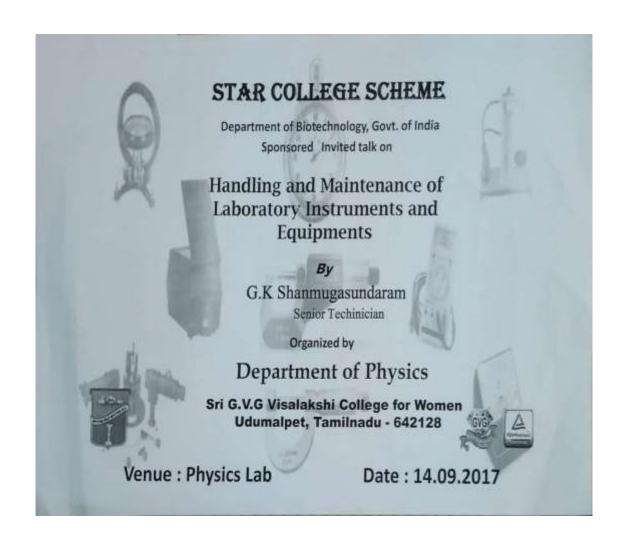

2.15 pm to 4.30 pm

Burance of System components

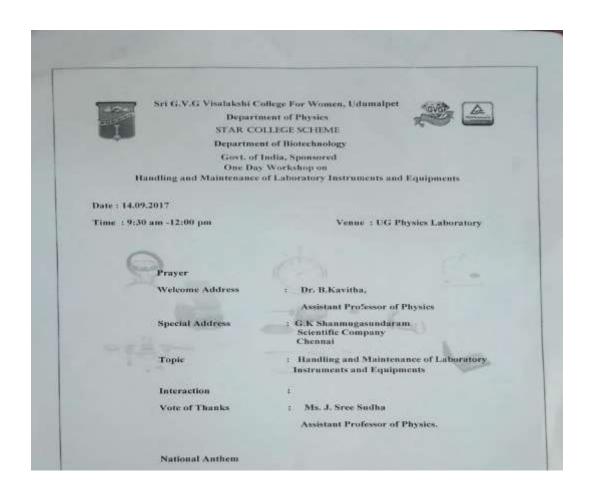

DBT-Star College Scheme

Workshop with Hand or Training on Sola PV Technology was enganced by the Department between 6th and 7th February 2018. Dr. in Swammer Head & Professor. Department of Physics from Gandhyram Pinal Institute in quarted the works and delicated a Inagenal and Experte Adhees Mr. Nambidaes & Mr. Sivakuman from MNS so Systems delivered Special lectures on the fapili action to 30 an px Technology Solan cells, clarge of 99 gaid power plant System Number of benificance of the workshop are 50. 40 shubert from reasity allege B. Mill Department Considerator Hot				9233

DEPARTMENT OF CHEMISTRY

Report on Hands on training funded under DBT Star College Scheme

Date : 2nd March, 2018

Resource person : Dr. S. Dhana Kumar Assistant Professor

Dept. of Environmental Science P.S.G college of arts and science

Coimbatore-14

Audience : II B.Sc. Chemistry Students (52) and Staff members (5)

Topic : Oxidane analysis and its parameters.

No. of Beneficiaries: 57

About the Hands on Training:

Water quality analysis

It is important to test the suitability of the water quality for its intended purpose, whether it is livestock watering, irrigation, or drinking water. This will assist a person in making informed decisions about the water and how we use it. The purpose of this hands on training on water sample analysis is to provide water quality testing information that will assist students using water from any source of supply. It provides information on the importance of water quality monitoring and how you can get it tested.

Why to test the water?

- Regular testing is necessary to determine specific water quality problems.
- · To help ensure, one is using water suitable for the intended agricultural use.
- To help ensure that the drinking water is safe.
- To help determine the effectiveness of the water treatment system.
 The quality of a water source may change over time, sometimes suddenly. Many changes can go unnoticed as the water may look, smell and taste the same as it always did.

Monitoring the water quality is necessary to ensure the treatment system is working effectively, providing the best quality water for the intended use.

The resource person trained the students for the determination of the following parameters in the water sample

- 1. pH
- 2. Conductivity
- 3. TDS
- 4. TSS
- 5. alkalinity
- 6. acidity
- 7. DO
- 8. chloride
- 9. Total hardness

DEPARTMENT OF CHEMISTRY

Report on Hands on training funded under DBT Star College Scheme

Date : 18.12.2017

Resource person : Dr.S.Murugan

Associate Professor(Retired) Dept. of Chemistry S.T. Hindu College Nagercoil

No. of Beneficiaries: II B.Sc. Chemistry Students (52) and Staff members (7)

Topic : Microscale Experiments in Chemistry

About the Hands on Training:

MICROSCALE EXPERIMENTS IN CHEMISTRY

The rising cost of chemicals and decreased flow of funds are causing great concerns to the chemistry teachers. A tug - of - war had also been going on in recent years, to balance the budget of running practical courses and the standards of experiments to be carried out by the students. Since the economy is always the winner, the number of experiments had been the losers. A group of scientists from University of Pune and Fergusson College, Pune are striving hard to maintain the standards of experiments at a friendly budget ie., by carrying out the organic reactions in capillaries / tiles, using semimicro test tubes for heating experiments(instead of the conventional test tubes) and adopting to microscale preparations. Their attempts serve many purposes.

(i) cuts down the cost of chemicals.

(ii) experiments have become environment friendly.

(iii) less time consuming

(iv) less hazardous to the teachers, students and lab assistants. Hence it becomes affordable,

Head, Department of Chemistry, Sn Svg v (Autoron) Double 12128

Sri GVG Visalakshi College for Women (Autonoumus) Department of Chemistry Report for Workshop on Lab Safety and Hygiene Date: 16.12.2017

A one day Workshop on Lab Safety and Hygiene was organized on 16.12.2017 by department of Chemistry under DBT – Star College Scheme Programme 2017-2018.

Mr.K.Krishnamoorthy, Lab Assistant, Department of Chemistry, Gandhigram Rural Institute, Gandhigram and Mr.G.M.Subramani, Glass Blower, Department of Chemistry, Gandhigram Rural Institute, Gandhigram were the resource persons of the programme.

Participants from our college, other schools and colleges attended the programme and get benefitted.

In the first session Mr.K.Krishnamoorthy insisted the important duties of Lab assistants, Lab safety and Hygiene which is to be followed in the laboratories.

- Laboratory assistants work in scientific laboratories includes, settings preparing experiments, processing specimens, maintaining lab equipment, and cleaning up after experiments.
- Before an experiment, laboratory assistants should process specimens and prepare the proper experimental set up. Afterward, they clean and maintain the lab and equipments
- They are responsible for setting up lab equipment such as microscopes, test tubes, calibrate glass flasks, as well as preparing and processing lab samples. They must know how to properly handle specimens according to established protocols and follow any regulations related to the type of sample.
- Laboratory assistants are in charge of cleaning lab instruments, sterilizing the test area, calibrating test equipment and following safety procedures when handling dangerous chemicals. They also ensure that the laboratory is stocked with the necessary supplies. They prepares simple reagents regularly used during lab procedures and ensure that the lab is stocked with the necessary supplies. This includes monitoring all of the supplies used in the lab and restocking them as needed.
- One of the integral duties performed by student lab assistants is securing the lab. This is done by cleaning up any spills, washing the equipment and glassware, such as conical flasks, pipettes and beakers used by students. Assistants also ensure that all caps and tops of reagent bottles are firmly fastened to prevent spills or leakage. They also put back all the reagents and equipment in the designated place after the lesson ends.

Sri GVG Visalakshi College for Women (Autonoumus) Department of Chemistry Report for Hands on training Synthesis and Characterization of Nanoparticles

The Department of Chemistry, Sri GVG Visalakshi College organized a one day hands on training program on 29th December 2017. The Chief Guest for this program is Dr.N.Neelakandeswari, Associate professor of Chemistry from Sri Ramakrishna Engineering College (SREC), Coimbatore. The program started with a pleasant prayer song followed by welcome address by Mrs. M.Malarvizhi, Head of the Department.

The first session covered the basic of Nanoscience and synthesis of nanomaterials. The guest faculty addressed on the topic entitled "Synthesis and Characterization of Nanoparticles". The lecture started around 9.30 AM and ended around 11.30 AM.

The session was made interactive by thought provoking questions posed by Dr. N. Neelakandeswarai to the student audience for which convincing answers were given by the student. The lectures come to an end with vote of thanks proposed by Dr. E. Vaishnavi

After that the 47 III rd year BSc., Chemistry students and 5 of the PG students from physics were separated into 5 batches. The second session was started by 1:30pm and this session was dedicated to the synthesis and characterisation of nanomaterials and discussion with student participants.

In this session the following nanomaterials were synthesised.

- 1. Chemical Synthesis of Copper nanoparticles
- 2. Chemical Synthesis of CdS Nanoparticles
- 3. Bandgap calculation of nanoparticle using UV-Visible spectroscopy.
- Chemical Synthesis of Silver nanoparticles.
- 5. Synthesis of ZnO Nanoparticles using Sol-gel methods.
- 6. Synthesis of nanoparticles using Ball milling technique.

She demonstrated all the above experiments by giving a brief procedure and also initiated the students to carry out the experiments. After synthesising the nanoparticles each batch students characterised the nanoparticles using UV analysis. The absorbance spectra were recorded for copper, cadmium sulphide, silver, zinc oxide nanoparticles. Band gap of metal oxide nanoparticles were calculated. From the results we could able to interpret the formation of nanoparticles. The absorbance peaks matches well with the literature report.

She also suggested III year students to pursue higher education and choose research as their carrier option. She concluded the session by explaining the basic concepts of spectroscopy.

The Hands on training has proven to be very inspiring and informative for the students. By the end of the day our students acquired practical experience through completing real-world, hands-on exercises and got the opportunity to synthesis nanoparticles.

OUR COLLEGE

Sri G.V.G. Visasakshi College for Women is a prestigious Autonomous institution founded in the year 1952 by the renowned Philanthropist Sri G.V.Govindasamy Naidu, an Industrialist from this part of the district. It is the first Women's College under Bharathiar University with 62 years of Academic Excellence in the Empowerment of Women. As an ISO 9001:2008 Certified Institution with the NAAC Re-Accreditation at the A Grade level, the college is continuously striving to establish the quality policy, "to Educate, Empower and Elevate".

OUR DEPARTMENT

The Department of Physics was established as a Major Department in the year 1986 at the 8.Sc Degree level and now upgraded as a PG department from the academic year 2013-14. Our Under Graduate students take-up National Graduate Physics Examination (NGPE) conducted at the All-India level by the Indian Association of Physics Teachers (IAPT). Students also attend summer courses in the Experimental Physics hosted by Institutions such as Indian Academy of Sciences, Bangalore, Homi Bhaba Centre for Science Education and Research, Mumbai etc. Our PG students undergo summer internship program at the Centre of Nanoscience and Nanotechnology, Bharathiar University Coimbatore, IGCAR, Kaipakkam etc.

ABOUT THE CONFERENCE

The development of Novel Materials with high performance and environment friendliness is today's requirement at global level. It is a challenging endeavor to synthesize, fabricate and characterize the materials to meet the requirements of day-to-day applications.

The scientific world today needs research and development in the field of Advanced Materials due to its utility in the wide range of sectors such as Electronics, Telecommunications, Energy, Aurospace, Defense, Medicine etc. Advanced materials are the impovations of modern science and technology developments.

The conference on "Advanced Materials" is an interdisciplinary venture, bringing together researchers from various fields of Science and Engineering to discuss about tailoring and synthesizing a material with new improved structural and functional properties at affordable fabrication costs of material composition, enabling technology in most applications.

Objectives of the Conference :

- To present a broad spectrum of knowledge in the synthesis, characterization and applications of novel materials.
- To highlight the advances and new findings in the materials and polymers.
- iii) To provide a platform to present the findings of the young researchers.

Topics to be covered

- Smart Materials
- Multi Functional Materials
- Conducting Nano Polymers
- Nano materials

CALL FOR PAPERS FOR DEAL AND POSTER PRESENTATION

The original work of the researchine's and students may be sent as an abstract in 250 words by Simple mall id gvgphy07@gmail.com Acceptance of abstract will be intimated to the participants. The soft copy of the full paper should be submitted. The Abstract and full paper should carry the title of the paper, name of the authors with their affiliations and email id, Times New Roman font with font size 12 and 1.5 line spacing. The abstract and paper should be neatly typed in MS word or PDF not exceeding 6 pages including figures and lables. Selected manuscript will be published in the "NCAM - 2015" with the ISBN number.

Important Dates

Abstract Submission - 21.01.2015 (by e-mail)

Abstract Acceptance - 27.01.2015 (by e-mail)

Full Manuscript - 02.02.2015

Registration details

Faculty Rs 500/-Students and Research scholars Rs 250/-

Participants are requested to send duly filled registration form along with the registration fee to be paid as DB drawn in favor of *THE PRINCIPAL, SRI GVG VISALAKSHI COLLEGE FOR WOMEN, UDUMALPET* payable at Udumalpet from any nationalized bank.

- Registration form may be downloaded from www.gvgvc.ac.in
- . Copies of registration form are also accepted

SUSTAINABILITY IN HIGHER EDUCATION MODELS AND TOOLS

29" September, 2016

Organized by

Internal Quality Assurance Cell (IQAC)

Sri G.V.G Visalakshi College for Women

(Autonomous)

Accredited at 'A' Grade by NAAC Affiliated to Bharatiar University An ISO 9001 : 2008 Certified Institution

Udumalpet - 642 128.

About the Institution

Sri G.V.G.Visalakshi College is a prestigious Autonomous Institution founded in the year 1952 by the renowned Philanthropist Sri G.V.Govindasamy Naidu, an Industrialist from this part of the district. It is the first Women's college under Bharathiar University with 64 years of Academic Excellence in the Empowerment of Women. As an ISO 9001:2008 Certified Institution with the NAAC Accreditation at the 'A' Grade level the college is continuously striving to establish the Quality Policy, "To Educate, Empower and Elevate".

IOAC at GVG

IQAC of the College was established in the year 2002 and since then it has been vibrantly working to ensure various aspects of the academic activities of the Institution.

The salient objectives are to

- Develop a generic system for consistent, cognizant, constructive and creative action to improve the academic and administrative performance of the institution
- Facilitate and support measures for institutional functioning towards quality enhancement through internalization of quality philosophies and institutionalization of best practices.

Colloquium at a glance

The sustainability in higher education implies double challenge in the process of learning concerning both "Paradigm" and "Provision". In this context, the possibility of reorientation of Higher education depends on widespread and deep learning attitude within the community and the policy makers should precede and accompany the matching change in provision and practice. The probability that any Higher education Institution responds to such a challenge with appreciation depends on three fundamental areas of concern; firstly the nature of path that dwells in with regards to Paradigm and Provision, second the nature of territory that sustainability indicates and the third being the journey into that arena from the prior one. The sustainability does not require any add-on to the existing structures and curricula; but simply it requires epistemology in our educational thinking and practice. This colloquium will provide a gateway to different views on curriculum, pedagogy, organizational changes and policies.
