Help the farmers to generate income, creating awareness on importance of forestry, help to sustain or even increase biodiversity, creates vital habitat for animals – 27.2.2018

With globalization the Indian Industry is focusing to re-engineer than supply chain and logistics activities to achieve the competitive edge Indian companies has created the need for a range of Logistics and Transportation solutions for the Industry, ranging from solutions for multi-modal transport, freight forwarding, material handling, warehousing, shipping, aircargo, packaging inventory management in integrating logistics and supply chains

Mrs.S.Nithya highlighted that after Logistics can be used as an effective weapon to combat competition. An efficient Logistics system allows a high level of international trade the enlightened that challenges the logistics industries face is that the dynamism of logistical function has become wider due to expansion in the size and its with dimensional operations of corporate enterprises Mr.V.C.Hamish enlightened the opportunities available in Logistics Industries in various divisions like warehousing Shipping, Transportation and in Documenting procedures in Export division. Mr.N. Naharajan emphasized that the Logistical Management starts with how logistical competency fits into a firm's overall

strategies overall positioning. The service platform of superior logistics achieves his typically characterized by alternative logistical capabilities, emphasizing flexibility time-based performance and most of all a commitment to perfect service performance. Hence the workshop covered the topic on challenges, opportunities and leverages of industries.

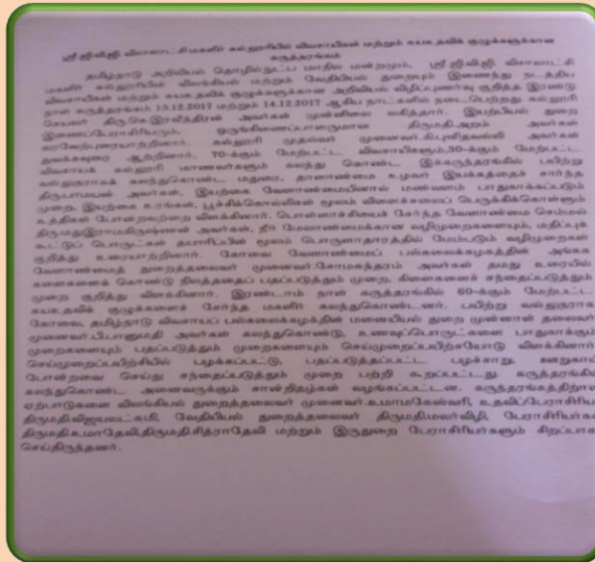

The students of Logistics were exposed to gain knowledge on challenges and opportunities faced by Logistics industries. The students came out with the feedback that which were several corporations use "Logistics leverage" to create competitive advantage in the world markets.
