Feedback

SALZER

It was Very nice experience. We had Practical experience that how the chips, electronic Circuit & Weldings. That compar atmosphere make us Very easy to know about the machines and equipments. The employers explained everything that they manufacture. We saw that some raw materials are manufactured in that company. They explained everything in step by step and very clearly. Overall it is Very Very useful to us.

KURUDAMPALAYAM:-

It is the most inspired Village.

Now we are Very glad to implement that ideas in our Village. Their ideas are Very unique & ecofriendly. We thought that waste is just a waste. But after visiting that Village. we realised that how we can reuse that waste. Being an Indian we should contribute to the cleanliness of India. But we are not like that instead of that we put lot of waste. As a physics student we wish to contribute to the waste management. Thank you Mam for took us to that place.
