

## Function Generator

### Salient Features

- Frequency wide range of function from 3 MHz to 10 MHz in general purpose and multifunction.
- Selection of waveform shapes apart from standard sine, triangle, square to ramp, pulse.
- The outputs are protected against short circuits and overload.
- It exhibits very good frequency stability over time and temperature variation.

### System Features

- Frequency Range 0.3Hz to 3MHz
- Digital Frequency
- LCD Readout for frequency & mode
- Waveforms: Sine, Square, Triangle, DC
- DC-Offset Adjustment
- Trigger Output
- Internal Sweep & External FM-Modulation
- Square Wave Risetime Typ. 40ns
- Distortion Factor < 0.5% (upto 100kHz)
